

Test Kit for Cockpit Door Decompression-Sensing Latching System

Model HSK6263-1

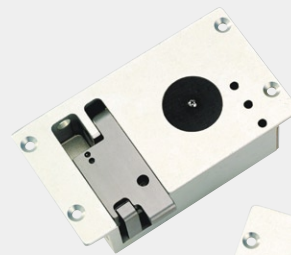

description

Through HASCO, you now have access to the most reliable, portable unit available to functionally test and re-certify Hartwell Corporation's HA1013 and HA1044 series security latches. The latches, now available directly from HASCO, are currently used on cockpit security doors manufactured by C&D Aerospace for Boeing, Bombardier, and Embraer narrow body aircraft.

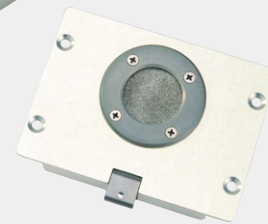

features

- Certified digital readout to ensure accurate vacuum is applied
- Annual re-certification available to ensure unit remains operational
- Low Battery Indicator informs operator when to replace
- Kit contains Series 475 digital manometer, N0. A-303 static pressure tips, rubber tubing, hex wrenches to release latch, instructions and durable container
- MSDS covering alkaline battery
- Easy-to-use
- Lightweight and compact
- Immediate delivery from stock

HA1044
[PMA approved]

HA1013
[PMA approved]
